

60W Constant Voltage -LED Driver

Discription

NSL-CB-60-2.5A-H is a 60W constant Voltage LED driver, that require a fixed output voltage with maximum output current. LED light that operate with a constant voltage driver require a consistent amount of output voltage, 24VDC this type of driver recives a standard voltage around 180-240V in the form of alternating current voltage which the driver converts to a low direct current coltage.

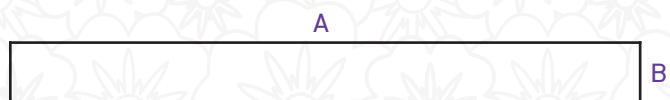

Features

- SELV
- Input Voltage 180-240VAC.
- Efficiency ≥88% .

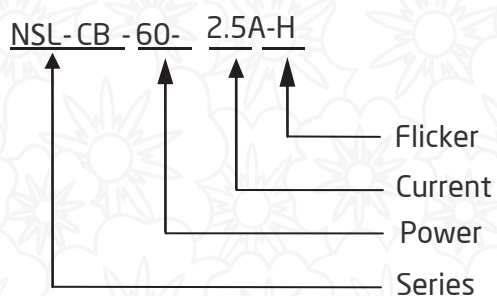

Product Application

- LED Strip
- LED Alu Strip
- LED Linear

Model Code

PRODUCT DIMENSION

Article No	Model	A (mm)	B (mm)	C (mm)
60250024	NSL-CB-60-2.5A-H	200	18	18

Product Details

Product Name	60w Constant Voltage -LED Driver
Part Number	NSL-CB-60-2.5A-H
Rated input voltage	180-240VAC
Frequency	50 - 60Hz
Circuit Structure	PWM Controlled
Type	Constant Voltage
Dimmable	Not Dimmable
TC	65°C
Efficiency	88%
Output Voltage	24VDC
Output Current	2.5A
Over Load Protection	105%-12% Hiccup mode, auto recovery
Installation	Indoor
IP Rating	IP20
Cool	convection air
Storage Temperature	-20°C +60°C
Operating Temperature	-25°C +45°C
Certification	CE,SELV
Size	200x18x18mm
Weight	96g
Input Connection	Entry 2x0.5mm ² (125mm)
Output Connection	Out 2x0.5mm ² (125mm)
Warranty	5 Years
